

IN THE CLAIMS:

1. **(Currently Amended)** A laminated sheet for the display of information, said sheet comprising a lower base layer which consists of a print layer (4, 8, 9) having a protective layer (1, 2) laminated on its upper side, ~~characterized in that~~wherein a net layer (5) of polyester is laminated below the print layer (4, 8, 9).
2. **(Currently Amended)** A laminated sheet according to claim 1, ~~characterized in that~~wherein the print layer (4) is formed by a rubber material.
3. **(Currently Amended)** A laminated sheet according to claim 1, ~~characterized in that~~wherein the print layer (8, 9) is a laminate which consists of PVC (8) and a plastics/adhesive layer (9).
4. **(Currently Amended)** A laminated sheet according to ~~claims 1—3,~~
~~characterized in that~~claim 1, wherein a glue (6) and a film (7) are laminated below the polyester layer.
5. **(Currently Amended)** A laminated sheet according to claim 4, ~~characterized in that~~wherein a plastics/adhesive layer (10) and a PVC layer (11) are laminated between the polyester layer (5) and the glue (6).
6. **(Currently Amended)** A laminated sheet according to ~~claims 1—5,~~
~~characterized in that~~claim 1, wherein the protective layer is formed by a

laminate which consists of a poly-urethane layer (2) and a frictional layer (1).

7. A laminated sheet according to claim 6, ~~characterized in that~~ wherein the frictional layer (1) consists of glass beads and broken glass.

8. A laminated sheet according to ~~claims 1—7,~~ claim 1, wherein the sheet has a thickness of between 0.3 and 2.5 mm or of between 3 and 12 mm.
